

## Shoreline Readers Club

Shoreline Readers is a book club for children who may need additional support in building the skills necessary for kindergarten. Our club emphasizes narrative skills, or a child's ability to retell a story. Current research indicates that retelling stories serves as the bridge from oral language to reading and writing and is a strong indicator of school success. At Shoreline Readers Club, we work on one age-appropriate and carefully selected book and by implementing evidence-based strategies within the structure and routine of the class and revisiting familiar material, we can improve your child's skills in the areas of:

- Receptive and Expressive Language
- Vocabulary and Concept Development
- Executive Functioning (attention and memory)
- Auditory Processing
- Formulating Ideas
- Pre-reading: rhyming, letter and word boundaries, letter identification, reading conventions, print awareness

At Shoreline Readers Club we foster your child's love of reading and reading with confidence while developing the social skills necessary to manage a small group environment, including:

- Listening and appropriately responding to their peers
- Cooperative Play
- Flexibility
- Perspective Development

The group is ongoing but commitment to the club is strongly recommended to help maintain consistency of the group dynamic. Our readers become friends and learn to rely on each other for support.

Tuition: \$100.00 per session
